

Air1 has been a hugely encouraging, upbeat, and positive influence in my life-- and free of commercials between songs!

If Air1 were displaced by a LowPowerFM broadcaster, I would be very disappointed and feel like I had been disconnected from a nationwide listening family. I would probably just quit listening to the radio on a regular basis altogether.

I believe that the service provided by Air1 is in the public interest because of the 100% positive programming available to anyone searching for a Constant in their lives. Air1 gives everyone an option that will uplift and encourage.
